## Feedback items during the UEC meet and greet

---

- I appreciate that the lab is trying to get approval to be a vaccination site. If possible, I think users should also have the possibility to get vaccinated, especially users who live in the village and users who have to come on site regularly. Keep up the good work.
  - If approved by the state of IL, vaccines will be available to onsite users and employees.
  - Has it been approved? Any update?

## Feedback items during the UEC meet and greet

---

- As you may know, the majority of the residents of the village are young people ( undergrads and grad students) some of us like to play video games to release stress, but with fgz and eduroam (even with guest) networks that is impossible due to the restrictions of the laboratory. I agree to have those restrictions at Wilson Hall because that is a place to study and to do work, but it would be nice if we had a separate network for the village, one less restricted that allows us to continue doing the things we like and that we feel comfortable with while we work in our research. ( Work and learning are an important part of our life but is not everything, there are some other small details that help us to have a happier life and also help us with our mental health). Thanks for your attention.
  - This item is related to the computer security
  - We have sent an email to [cybersecurity@fnal.gov](mailto:cybersecurity@fnal.gov) to discuss the possibility to implement it further
  - Received a reply from Cyber Security team (see next slide)

# Reply from Cyber Security Team

---

- There are restrictions applied to any network funded by the DOE contract including “guest”, “fgz”, and “eduroam”.
  - At the same time, village residents are meant to offer services similar to any commercial hotel in the surrounding area.
- This topic has been revisited over few years. We don't have any clear solution yet but we do have a few options to proceed further.
  - **Ideal solution:** To arrange a commercial IP provider for the internet. Negotiations often ended with million+ dollar contracts with many year commitments not including the approvals needed from DOE.
  - **Short-term option:** residents may obtain a cellular MiFi router from Housing Office. It might not work best for intense gaming and might not work with other devices though.
  - Working with Networking to come up with a less restrictive network. It would be an additional virtual network perhaps “residential” rather than “guest” available to the village residents only. This solution requires various approvals and security controls. This would be similar to what you would get at a hotel.
- We will keep UEC informed about the progress and welcome their input

# Open feedback items

- Using the Weather Diff pay code for parenting purposes.
  - Met with Deanne and Ilene and discussed about the possibility of a program similar to ANL vacation donation program for parenting purposes.
  - We are asked to have a survey among FNAL employees to see if most of them will get benefit from it
  - This topic was also discussed in SAC meeting and received positive feedback
  - Doug Berry from SAC is interested in working with us on the program development

## Open feedback items on Hold

---

- We used to get UEC meeting minutes emailed out each month, and I just noticed that there aren't any minutes for the 2020-2021 term on the website. Would it be possible for these to be made available? -- To be resolved.
  - Meeting minutes for the months of July, August, and September 2020 sent to all-users this Tuesday
  - **Resolved!**
- Housing rental agreement for users to get driver's licence. -- to be reviewed again in March.
  - Will be reviewed and updated next month
  - Any update?

## Next QoL meeting dates

---

- April 13th, Tuesday 11 am CST
- May 18th, Tuesday 11 am CST
